On September 24, 1984, the Public Service Commission of South Carolina (the Commission) issued Order No. 84-732 in the instant Docket which, in pertinent part, required MCI Telecommunications Corporation (MCI) to complete a statistically valid study to determine the extent to which intraLATA calls are being completed in violation of its interLATA certificate. The study was to be due January 15, 1985.

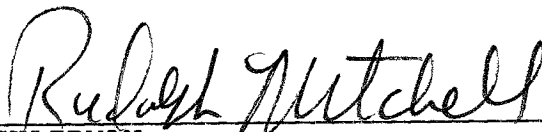

MCI notified the Commission by letter that due to technical difficulties, MCI has been unable to compile the statistical information available in approximately three (3) weeks and accordingly seeks an extension of time to comply with the Commission's Order.
